ARFF

Aircraft Rescue and Firefighting

When the airport industry is faced with accidents, disasters, and other emergencies, you must have the knowledge and skills to quickly and efficiently mitigate these situations. Classes consist of classroom, tabletop scenarios, and hands-on tactics and strategy training.

Audience

ARFF courses are designed for individuals who provide fire services protection at airports. This may include Military and Department of Defense Firefighters, Municipal Firefighters, or Volunteer Firefighters

Certifications

Several classes are eligible for Pro Board, TCFP, or IFSAC certifications. See individual course descriptions for more details by visiting www.teex.org/arff

Location

Courses are conducted at the world-renowned TEEX Brayton Fire Training Field in College Station, Texas

Custom Courses
