

ACCELERATING
PROFITABLE GROWTH
FOR MANUFACTURERS

The Texas Manufacturing Assistance Center (TMAC) accelerates the profitable growth of manufacturers by implementing methods, innovation, technology and best practices to develop and improve products, processes and people. The TMAC Gulf Coast and East Central Regions operate out of the Texas A&M Engineering Extension Service in Houston and College Station, TX. TMAC is an affiliate of the Manufacturing Extension Partnership (MEP) program of the National Institute of Standards and Technology (NIST).

ISO 9001: 2015 Transition

A comprehensive, 1-day workshop introduces the new ISO high-level structure for management system standards (Annex SL) and review the changes between ISO 9001: 2008 and ISO 9001: 2015. The course will provide information that will enable participants to identify the key gaps in their current Quality Management System (QMS) and start planning the transition to the new requirements.

Key Topics:

- Review of the new requirements of Annex SL (Appendix 2) and how it affects the quality management system structure
- Workplace Organization
- Review of the risk-based approach and its significance
- Explain the key changes between ISO 9001:2008 and ISO 9001:2015 and interpretation of these requirements
- Review of documentation requirements and its impact on current documentation structure, including the numbering scheme
- Review of the transition timeline and identifying the appropriate time for upgrade certification
