# Industrial Emergencies for Municipal-Based Responders

The Industrial Emergencies for Municipal-Based Responders program (IEMBR) trains municipal firefighters to handle industrial and other non-traditional emergencies.

**Phase I,** the online portion of this training is targeted to give a specific tactical approach for handling an industrial emergency response.

**Phase II,** the practical hands on exercises introduce and reinforce the tactical methods required to mitigate an industrial emergency incident.

## Overview

LyondellBasell is proud to collaborate with TEEX to offer specialized industrial emergency training to 60 of our community firefighters. We stand together on the front lines and recognize the importance of helping to ensure our fellow firefighters are trained. We are committed to being responsible, good neighbors in the communities where we operate. This investment is one example of that commitment and supporting our first responders is a key focus area for our charitable giving program.

## Courses

**XTN092 Phase I** —For additional information and to prepare yourself for Phase II training, please take the Phase I online course prior to your arrival.

**IND029 Phase II** —Training takes place on TEEX Brayton Fire Training Field in College Station, Texas. Two weekend opportunities are available for your convenience. See Phase II course information.
