## TEEX Annual School Industrial Firefighter Training Program

**LPG** 

**Emergency** 

Management

This course is

for personnel or

**ERT** members

who may

respond to an

LPG release and

need to control

or disperse

large vapor

clouds.

Suggested Course Path

**NFPA 1081** 

**Exterior** 

**Firefighting** 

This NFPA

Pro Board

course is the

baseline for

all industrial

fire brigade

members

in exterior firefighting.

### Advanced Exterior Firefighting

Level II

This course

introduces the firefighter to leadership strategy & tactics and teaches how to implement them at the ERT leadership level.

#### NFPA 1081 Leadership

This NFPA Pro Board provide the industrial firefighter with a solid foundation to manage emergency response. The course defines leadership roles, provides basic reference knowledge to frequently used standards, and teaches how to manage resources at an incident scene.

# Incident Management for Industrial On Scene Commanders

This course

develops the firefighter with a more refined role as the fire officer at the incident commander level. This course addresses the strategic and tactical response issues required to safely manage an expanding industrial incident.

#### NFPA 1041 Instructor I

This NFPA Pro

Board course continues to develop the firefighter / fire officer into a level I instructor; capable of delivering effective training to emergency response personnel.

OPTIONAL: NFPA 1081
Interior Structural Firefighting

This NFPA Pro Board course is the baseline for all industrial fire brigade members in interior firefighting.

**Industrial** 

**Safety Officer** 

(ISO)

This course

teaches the

emergency

responder how

to function as a

safety officer at

an industrial

emergency

scene. Gain

confidence in

your ability to

handle a variety

of emergency

situations

through

classroom

exercises,

including

building an

incident safety

plan.
