DHS/FEMA-funded course

MEDICAL MANAGEMENT OF CHEMICAL, BIOLOGICAL, RADIOLOGICAL, NUCLEAR AND EXPLOSIVE (CBRNE) EVENTS

PER-211

What if a catastrophic event occurs? Will you be ready? Will you need a special level of protection? Is decontamination necessary? Do you have the right medications? This course answers these questions and more as you learn how to distinguish between different agents of concern that could be used in an incident. A combination of facilitated discussions, small-group exercises, human patient simulator hands-on scenarios, and traditional classroom discussions are used to present the topics. The multi-discipline make-up of the participants helps to strengthen information sharing, communications, and medical surge capabilities.

Topics

- Environmental Factors and Appropriate Self-Protection Measures for First Responders and the Public
- Planning For Potential Consequences of a CBRNE Incident
- Recognizing and Identifying CBRNE Agents and Their Physiological Effects on the Human Body
- Basic Decontamination Considerations
- Appropriate Triage Methods
- RAPID-Care Concepts
