TEXAS A&M PUBLIC WORKS RESPONSE TEAM

**Water and
Wastewater
Strike Team**

TEXAS A&M ENGINEERING

EXTENSION SERVICE

Personnel

- 1 team supervisor
- 2–10 team members for operations work
- 1 team safety officer
- 4–12 total personnel

Equipment

- Contingent on severity of incident.

Task & Purpose

- Receive and utilize all material resources arriving at the local area of operations.
- Provide appropriate personnel to complete emergency response and repairs.
- Provide technical assistance to local response personnel and agencies.
- Provide continuous feedback to State Operations Center staff to provide accurate and complete situational awareness.

Mission Function

- Support local responders by providing technical and specialized assistance and information.
- Enable faster recovery from water and wastewater emergencies and incidents.
- Specify parts, materials, and equipment needed for proper response and recovery.
- Provide turnkey guidance from initial assessment to final solution.
- Provide hands-on assistance.

The Water and Wastewater Strike Team is tasked with repairing damaged water utility systems and restoring their functionality. There are several positions on this critical team to ensure that systems are thoroughly evaluated and properly repaired in a safe manner.
